Flexible Sensor Cystoscope

Ultimate flexibility meets sensor technology.

Introducing Richard Wolf's newest flexible sensor endoscope for the ENDOCAM Logic 4K camera system. The **MAMBA vision** offers 210° bidirectional deflection, allowing the surgeon to easily visualize and navigate the bladder.

Featuring a slim outer sheath, 11.5 Fr. atraumatic distal tip, and a large 7.5 Fr. working channel, the **MAMBA vision** provides enhanced patient comfort without sacrificing irrigation. Its cutting-edge sensor technology generates a brilliant image and its lightweight, ergonomic handle helps ensure ease of use throughout a procedure.

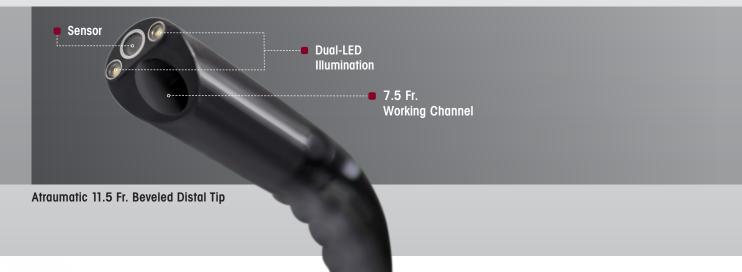

Sensor Cystoscope Picture

210° Bidirectional Deflection

Flexible Sensor Cystoscope

- 210° bidirectional deflection for precise control and navigation.
- Large 7.5 Fr. working channel for optimal irrigation.
- Atraumatic 11.5 Fr. beveled distal tip for easy insertion and enhanced patient comfort.
- 16.2 Fr. sheath.
- Two distally-integrated LEDs for superior illumination.
- Two programmable camera buttons.
- Special Imaging Modes (SIM).
- Ergonomic handle and axial cable.

Single-Channel Flexible Sensor Ureteroscope

The multifaceted instrument for all-around application.

Ureteroscopy

Engineered with Richard Wolf's latest sensor technology, the **BOA vision** produces a crisp, clear image of the upper and lower urinary tract. Its stiff shaft, slim 6.6 Fr. distal tip, and 270° bidirectional deflection make this flexible ureteroscope ideal for complex anatomy.

Featuring a 3.6 Fr. working channel, the **BOA vision** can be inserted through an access sheath as small as 9.5 Fr.

Sensor Ureteroscope Picture

Bog

Single-Channel Flexible Sensor Ureteroscope

- Compatible with a 9.5 Fr. access sheath.
- 270° bidirectional deflection.
- 3.6 Fr. working channel.
- Atraumatic 6.6 Fr. beveled distal tip for easy insertion.
- 8.7 Fr. sheath.
- Integrated LED illumination and distal image sensor.
- Two programmable camera buttons.
- Special Imaging Modes (SIM).
- Ergonomic handle and axial cable.

Atraumatic 6.6 Fr. Beveled Distal Tip

 $\mathbf{270}^\circ$ Bidirectional Deflection

Dual-Channel Flexible Sensor Ureteroscope

Optimizing stone therapy.

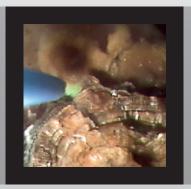

As the first and only dual-channel sensor ureteroscope on the market, the **COBRA vision** is changing the landscape of stone therapy.

Two independent working channels allow the surgeon to perform laser lithotripsy and extraction without having to interrupt a procedure to change auxiliary instruments.

The **COBRA vision** also has a unique laser shifter, which can be used to precisely position and fix a laser fiber during a stone procedure.

Ureteroscopy

Sensor Ureteroscope Picture

Two Independent Channels

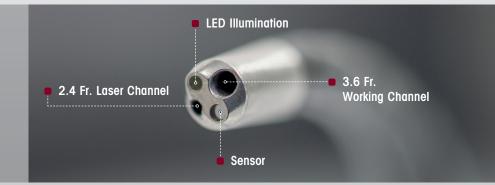

Dual-Channel Flexible Sensor Ureteroscope

- 270° bidirectional deflection.
- Two independent channels (3.6 Fr. and 2.4 Fr.) for the simultaneous use of tipless baskets and laser fibers.
- Atraumatic 5.2 Fr. beveled distal tip for easy insertion.
- 9.9 Fr. sheath.
- Integrated LED illumination and distal image sensor.
- Two programmable camera buttons.
- Special Imaging Modes (SIM).
- Ergonomic handle and axial cable.

Atraumatic 5.2 Fr. Beveled Distal Tip

ENDOCAM Logic 4K

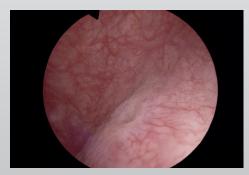

The new definition of sharp.

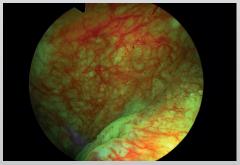

The ENDOCAM Logic 4K camera system-the newest addition to the ENDOCAM Logic line-brings the clarity and brilliant detail of 4K to the operating room. The ENDOCAM Logic 4K is a true plug-and-play system, allowing the user to plug any Richard Wolf flexible sensor endoscope directly into the camera control unit. The built-in touch screen offers intuitive control, as well as the ability to make quick setting changes and create custom user profiles.

ENDOCAM Logic 4K Camera Control Unit

COLOR CONTRAST I-III: Enhances contrast and reproduces select colors.

CONTRAST I - II: Enhances anatomical structures without altering their natural color.

Special Imaging Modes: The Difference is in the Detail

Richard Wolf's vision family of sensor endoscopes allow the user to select, at the touch of a button, one of several SIM modes, each designed to help facilitate easier tissue differentiation.

ENDOCAM Logic 4K

Sustainable Technology

The camera control unit's USB port enables in-field software updates, ensuring the system is always in sync with our latest video technologies.

Equipment Versatility

The ENDOCAM Logic 4K is compatible with all Richard Wolf vision sensor endoscopes. This turnkey system also gives facilities the flexibility to upgrade their ENDOCAM Logic HD system incrementally.

User-Friendly Interface

The camera control unit's built-in touch screen provides ease-of-use and intelligent menu navigation.

Tailored Visualization
 The ENDOCAM Logic 4K is equipped
 with several preset surgical profiles that
 have been field-tested to deliver vivid
 images for various endoscopic
 procedures, including cystoscopy,
 ureteroscopy, and resection.

High Dynamic Range (HDR): Lightens dark areas and reduces overexposure.
